Don't waste your money on this game... upgrade in graphics so they can market the living S%!t out of it but a complete downgrade in almost every other part. very disappointed. save your money for a different game IMO. If you like having bunny ears, cat ears, little bear/panda ears then this is a neko's dream but anything else I guess its a upgraded skin of ypu ever only play those 4 main characters (if you are like me who got this for free then no point on paying just wait till sell if you are getting this DLC skin). the best thing about this game was uninstalling it. I assumed it was simplistic and linear as a sort of tutorial. I kept waiting for the actual puzzles to begin... then the game ended. The closest thing to a challenge is guessing which of two options is correct, and which simply forces you to restart the level.. I bought this game for about 10 bucks (one copy for a friend of mine, one for me), expecting it to be a great co-op and PvP game, after reading the glowing reviews and the way it is advertised on Steam.

What can i say? Don't bother. There's a good game in there but you can hardly play it. The first thing i noticed were input and settings related bugs. Then crashes. But worst of all, no servers and the inability to actually create a co-op room and invite you friends (remember, it was advertised to have this feature).

If you're lucky, you may still find a dedicated server, which most likely will be empty. If you create your own lobby, you will be unable to invite your friends and your friends won't be able to see it in the server browser (we tried it, multiple times and with multiple settings/solutions).

The only way to play this online, is to get into one of the two empty servers i have found and let your friend join them too. The downside is, you can't select the game mode or map and you most likely end up in opposing teams (1vs1 basically).

It's a shame, really, because the game itself promotes to be fun. I don't care if this was released on 2011. It's still sold and advertised on steam and i expect the advertised features to work. It may be "just" 10 bucks, but i want it back anyway.

This game is the straw that broke the camel's back and i will refrain from buying anything on steam for a while.. For a first time game for these two gentleman I must applaud them. And two years to complete. I've been waiting for some games for years and they have a budget and a whole team working on it. This game has lots of aspects to it and can always add more content and story lines. There is really no end to it. You are really trying to survive from the elements, animals, everything you would expect from mother nature!

For the price you can't go wrong. I didn't have any trouble with hardware and the game ran smooth mostly. A few crashes when it came to loading from dying and such. But not anything a million dollar title hasn't had.

And why doesn't Steam have spell check!!!? lol

Good job developers! Thanks for a very challenging game!. This series is one of my favourite puzzle platformers of recent years. I thoroughly enjoyed the challenge, art, and music. The short bits of dialogue are charming and the overall game is laid out really well. I do find that there is a sudden spike in difficulty in some levels, but it's never so discouraging as to stop. The solution is almost always clear and it's just a matter of pulling it off. Overall a great little puzzle game.

A simple timewaster, didn't encounter bugs and enjoyed it for what it was.

Just throw stuff at other stuff, some simple objectives, nothing deep here but it is free so why not give it a try..

Drawing\u2665\u2665\u2665\u2665\u2665\u2665 never been so much fun!. I don't know if it's all the god awful steam games i've played in the past, but i'm gonna give this one a thumbs up. It's an intense Fnaf style game about keeping your spaghet warm. The graphics are nice and it's pretty darn spooky.

As a little hint, You DO want to look at papa

<https://www.youtube.com/watch?v=GTXdqdk4HqI&feature=youtu.be>. This game is absolutely beautiful in every single way. The visuals are absolutely breathtaking, and almost every scene looks like a piece of art. The sound effects for each movement are perfect, and the music is wonderful. I enjoyed the gameplay as well. The platforming is quite easy, but the new abilities and atmosphere requires thinking and strategy. Every time I felt lost, or didn't know where to go, the game ended up leading me where i needed to be. The game is a bit more slow paced, but I personally enjoyed it because it felt relaxing. If you are looking for an intense platforming game, this is not it. However, if you are looking for a puzzle\exploration game that is pleasurable to your eyes and ears and tells an incredible story, I highly recommend. This is probably one of my favorite locomotive addons, and I rather enjoy the TPO operations in the various career and scenario missions. Typical quality found in Victory Works, including wheel slip and overfilling the boiler. If I had to gripe, and this would be minor, it would be the lack of any lighting in the cab when operating at night (something you'll do often in the career). That being said, I can't recommend this enough, and it offers a lot of fancy options, locos, and a really cool working TPO!

Seriously, get this baby. She's a ball!. Wow, what a fun mix of tower defense and first person VR action!

There seems to be quite some balancing left to be done, but the game is very cool overall.

I really enjoyed the gun's mechanics it is so much fun to shoot in all direction like they do in the matrix!

Even though not perfect, I'm glad about my purchase. This game has a good potential.. Farmer Bob walked out to his field and looked over the fresh crop. For some reason, everything seemed a bit sharper and better looking lately. Which made Bob happy. But many of his favorite tools had vanished from the market, which made Bob unhappy. Surely they would return to the market later, but he'd probably have to pay for the access. "The Man" was always stickin it to Bob like that. Because that's "The Man"'s job.

Bob looked over his combine. It was dirty, but there was no damage to it, but that was expected. There was never any damage. He'd taken to jumping his tractor off cliffs and humming Dixie. Maybe he'd get a horn set up for it.

Bob's life was never exciting. There were no aliens, commie invasions to fight off, or Godzilla vs Mothra battles in the north 40. But that's okay. Bob drove tractors. He liked driving tractors and combines and loaders in giant circles and squares and quadrilaterals and stuff. And that's what's important in life. That, and sneaking off with the chickens' eggs to make some extra cash. It helped that he'd clubbed that dang rooster over the head every time he heard it. It finally seemed to shut up, or at least turn the volume down.

The south field was already planted, so Bob hopped into yet another tractor and hooked up a sprayer. Setting the brand spankin new cruise control to its only value - cruise, he activated the spray and drove his first pass over the field. Coming to the end of the field, he shut off the sprayer. The cruise control immediately sensed the shutoff and floored the accelerator. Bob whipped the tractor around as fast as he could and the cruise slowed a bit through the turn. But when he straightened out, the cruise shifted into warp 7. The inertial dampeners failed and Bob was crushed against the back seat of his machine, accelerating out of control. As his ribs cracked and he lost consciousness, his last thoughts were of how poorly the English language could express his dislike of the new cruise control. At least the tractor wouldn't be damaged.

. Pro:

Challenging

Very Retro

Fromage cutscenes

Low system specs

Con:

Difficulty starts at 9/10 and goes up from there

Very Retro (read: Dated)

Not as good as 7th guest

Not 100% win10 friendly

Overprices at \$6.49. It's a \$0.49 bit of history at best.

No cards / achieves

Overall:

5/10 +1 retro, +1 difficult, -2 very very dated (and not in the fun way) -1 overpriced = 4/10

If you don't have the 7-11 bundle then wait till it's on sale and grab it. If you like 7th guest grab it. If you're into very dated puzzlers grab it. If you like new, 100% compatible games, you may want to pass.

Voted down just because I can't justify spending any more time on this game for this price. There are more fun games for less cost on steam.. I enjoyed the game and used pen and paper (!) to help solve the puzzles, but it proves once again how hard it is to make a puzzle game. The logic is often flawed to me. Many times you get lost in the game, because it is unclear that you need to solve another puzzle to solve a puzzle, while that puzzle is only vaguely and cryptologically mentioned on a wall, or when you need to match colours, but the difference between yellow and orange is hardly noticeable. I do recommend this game, as it is a good game.. This game has a huge potential. However, every new game they release is just a worse copy of the older one. I bought it for new updates etc. hoping that the game could be playable now, but no... economy, relations, ai pathing issues are just too bad for a grand strategy game, and those problems aren't new. Also lack of events, new features etc. is just not possible to accept. After all these years, they just should have made much more than this broken game. I really wish that they will fix all the issues and add new things to it later, though I don't have any hopes now.
