About This Software

VertoStudio VR is a fully-capable 3D modeling studio designed to run entirely in VR! No mirroring or external software is required of any kind. You can use it to import FBX, OBJ, DAE (and more) directly in front of you, then configure every aspect of the visual display of these scenes directly down to the individual polygons. It also supports a full-scale desktop 3D modeling mode that can run at the same time as the VR mode!

Whether you are mocking up a quick VR workflow, or designing production VR environments, this tool eliminates all of the pipeline complexity involved with getting 3D assets and content into VR quickly. Using Verto Studio, there is no more guesswork in designing for VR. By including a traditional desktop-based 3D modeling mode, artists can move into VR at their own pace, and leverage the benefits of both modes as they navigate their way into this new technology.

Verto Studio VR Features

-
- Create 3D scenes from scratch without the need for external computers or software.
 - Prefabs: Plane, Cube, Sphere, Torus, Cylinder, Sketch (draw in 3D), Terrain height map (image based), Text (supports custom ttf fonts)
 - Object edit mode: Rotate, Translate, Scale, Select entire objects and manipulate their transforms.
 - Includes real-world unit system for editing absolute position and scale of objects in meters.
 - Snap to grid, snap to vertex, snap to edge, snap to face
 - Low-Poly CSG (Union, Intersect, Subtract, Chisel)
 - Live polycount reduction (quadratic mesh simplification),
 - UV texcoord editing
 - Subdivide
 - Mesh smooth
 - Vertex weld
 - Grabbing objects & polygonal selections via grip buttons.
 - Teleport and Fly locomotion support
 - VR Skyboxes environments: Includes Blue sky, gray sky, light grey environments (or can be disabled).
 - Immersive VR (IVR) scale setting via simple control to easily dial in scale of entire scene.
 - Left-handed controller mode.
 - Multiple editable lights
 - Material editing: Phong, Reflective/refractive environment mapping, Bump mapping, Toon shading
 - Runs custom GLSL shaders created in other versions of the app
 - File importing: FBX, DAE, OBJ, and more
 - File Exporting: OBJ and vsxproj (Verto Studio)
 - Concurrent editing features (drop into desktop editor while in VR at the same time).
 - Export Verto Studio scenes to cloud drive.
 - Full-featured Desktop Mode allowing editing concurrent with VR viewer (two-user mode).
 - VR Voice Commands on Windows 10 "Edit", "Select All", "Delete", etc.
 - HoloPlay mirroring support for Looking Glass Displays
 - Complete file compatibility with the HoloLens, iOS, and Mac versions of Verto Studio 3D

-
- and more!

Title: Verto Studio VR
Genre: Animation & Modeling, Design & Illustration, Game Development
Developer:
Verto Studio LLC
Publisher:
Verto Studio LLC
Release Date: 20 Jul, 2017

a09c17d780

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7 SP1 x64 or Newer

Processor: Intel Core i5-4590 equivalent or greater

Memory: 8 GB RAM

Graphics: GeForce GTX 970 or AMD Radeon RX 480

You call this a racing game, but I know an endless runner when I see one. Dull and derivative. Chipzel, though.. DONT BE FOOLEDI only gave it a thumbs up because i bought it on sale a long time ago and other reasons.

1. Unique artstyle and cool music
2. I didnt pay full price
3. I did enjoy myself sometimes

BUT

the game can and most definetly will often be very, very, very frustrating. Mainly not because it is difficult but because the game doesnt implement optimal mechanics for attacking (timing which direction to hit) or platforming. Also i feel like the game tries to be over the top challenging in its platforming section making it feel like im playing flappy bird with extra steps.. Game started me off in an impossible position, with no move i can make.

I've played LOGistical OG game - liked it. Wanted the UK version, completed the Isle Of Mann tutorial and now I can't do anything. What am I supposed to do with this game now. AFTERGRINDER comes Tinder or buttsex

Drops mic

10 from 10 for dad's joke. This game probably won't entertain anyone that doesn't have nostalgia for it, and those like myself who do will resent the new pathetic and useless controls. The game also lacks any sense of appropriate resolution control and resembles the poorest of poor, half♥♥♥♥♥attempt of a port. Do not buy.. My video review:

<https://youtu.be/DAO-7pQgLRI>

errrrrrrr... I think watching cheese mature would be a better way of spending my time. Caused temperature alert on startup, no real help, no real fun. This is a personal opinion and may not necessarily be your own experience of this game. Give it a try if in Steam sales, but you need to like the "work it out yourself" genre.

. Waste of money. Not needed.. The soundtrack is awesome, no matter. But why do you sell only 1/3 of the whole soundtrack!? I regret the hasty buy without checking the description. For me a soundtrack includes all songs, not a selection. Rather download the songs from youtube if you want the complete OST...

EDIT: The songs are now completely available with this DLC. Thanks for updating it. Now it's really worth the buy ;). Got this game and all the DLC for free.

I must say it has a good gameplay, although I don't like this kind of games.

. Nice room, but... that's all. No movement nor interactions on HTC Vive.

. good game and fun xD my advice download this game !!!xD. My favorite! This is the Best DLC!

v1.0a Update:

We have updated Congo to v1.0a. We have done a lot of bug fixes, optimisation and improvements to AI and gameplay, including fixing the water from sometimes blocking bullets, to fixing some bugs that were being experienced when trying to unlock achievements.

Also, we have 50% off this week! Perfect time to grab some mates, some drinks and get lost in the jungle!. **Important: How to solve crash after splashscreen:**

There is a known bug that we are actively working on solving, mainly affecting players on Windows Mixed Reality but also some players using TPCast, where the game crashes immediately after the splash screen. This is caused by a third party library used when synchronizing audio with mouth movements for the Reaperman.

To solve:

Open the folder *C:\Users\<your username>\AppData\LocalLow\Odd Raven Studios\Carly and the Reaperman* and find the file *settings.ini*. Open it up in notepad and find the line saying

audioToMouth=1. **The Treasure Map Update is live!:**

Dear all,

[As we announced last week](#), **Fear the Wolves expands today** with the release of the massive Treasure Map Update. We're really happy to share with you the change log for this update which includes multiple new features, including a new weapon and enhancements to existing systems.

Added in this patch are a number of new looting rules and mechanisms to keep players discovering new elements of the map. **Secret Stashes are now hidden throughout the ruins, containing high-tier loot** that will give you an advantage over other scavengers, unlockable **only with a treasure map** findable in the wilderness.

Some buildings are also now boarded up, requiring the fire axe to break down the door and gather the goods inside. Waiting inside may be the **new DMR SOK-94 sniper rifle**, optimal at medium to long range.

Upgrades have also been applied to many of the game's premier features. A full pass has been made on **wolf behaviour and balancing, making them far more dangerous** to players and a true PvE challenge.

Singular wolves will now attempt to sneak up on players, and packs are much more aggressive at protecting their territory and chasing down fleeing players, with more health and enhanced attack patterns. This joins **tweaks to weapon balance, shooting feeling, and the addition of rooftop helicopter extractions** to make Fear the Wolves better than ever before.

These changes join a host of quality of life tweaks, bug fixes, and minor additions - such as **new end and tutorial screens, an improved drop experience, and additional sounds** - to answer player demands and improve the game for everyone.

The NVIDIA Highlight system has also been integrated, allowing for automatic recording of big plays and huge kills for easy sharing on various platforms.

As always, please feel free to contact us if you have any feedback or technical issues that you want to alert us to. You can find

the details of this patch below.

Features. 0.40.0 - Market Fluctuations:

Version 0.40.0 further expands Enceladus Prime station, but also improves few aspects of the demo. Changelog:

- Upgraded game engine to latest version.
- There is now a fully functional Mineral Market at Enceladus Prime station. You can buy and sell various minerals.
- Added basic market simulation - prices of minerals change over time.
- Polished appearance of certain anomalies.
- Adjusted lighting settings (again).

. May Dance:

The bees are busy, and you can profit! From now until May 29 at 11:59 am CEST, you can produce wildflowers, honey and apple juice twice as fast!

Have fun playing!. **Stronghold Next Update:**

13 Things You Need To Know. **NeoBalls2 was released:**

<http://store.steampowered.com/app/786560/NeoBalls2/>. **Boring Man v1.2.0.2 is now available:**

- Fixed some more crashes
- Fixed boomerangs not disappearing properly
- Fixed game over message in Survival
- Max health from the "Wine" vice now maxes out at 500
- Fixed gas clouds poisoning team mates with FF off
